

ADDENDUM NUMBER 1
SHAMROCK PAVILION A/V DESIGN & INSTALL
PROJECT NUMBER: TYR-2026-01
03/13/2026

The following changes, modifications, and/or clarifications to the project documents or a part, thereof, and change the original documents only in the manner and to the extent stated.

1. Internet is planned to be served at the project location. Our service provider is WOW fiber internet.
2. Control racks are envisioned to have weatherproof installation behind the stage unless unforeseen conditions prevent this.
3. CAD files of the structure can be made available after project award. The Town's Bid page contains a full PDF set of current architectural plans.
4. The expected payment terms would be based on project milestones with a retainage.
5. Bonding will be required for this project.
6. Basic anticipated electrical infrastructure to A/V equipment locations is already in place. Any extra electrical infrastructure may use existing conduit to these locations.
7. The preference for the projection system is a permanently installed projector with a screen that can be deployed per event (does not need to be permanently installed other than mounting locations). The town is open to a fully deployable system per event if it can be shown as more suitable for our use purposes.
