

Specimen Tree Certification Statement

Town of Tyrone Land Approval Application Document

Any “specimen tree”, defined herein as,

“(1) Any deciduous tree with a diameter of 24 inches or greater.

(2) Any coniferous tree with a diameter of 30 inches or greater.”

that is located within the proposed limits of disturbance or within 25 feet of the proposed limits of disturbance for this project shall be shown on the site plan.

Specimen trees removed with prior approval from the town manager **must be replaced** in addition to the minimum site density standard to compensate for their removal. Specimen trees must be replaced in an inch-by-inch basis by species with the potential for comparable size and quality. For example, removal of a 30-inch diameter tree would require replacement with 15 two-inch caliper trees of a comparable species. This tree replacement is in addition to the minimum site density.

Any specimen tree removed without the appropriate review and approval of the town manager **must be replaced** by trees with a total density equal to twice the unit value of the tree removed. Size alone will determine whether a tree was of specimen quality if the tree is removed without approval and there is no evidence of its condition.

As the applicant for an Environmental Approval Permit or Land Disturbance Permit for project _____, I do hereby covenant that the information supplied with this application is true and correct and I do hereby agree to comply with the ordinances of the Town of Tyrone pertaining to land use and development. It is understood and agreed by the applicant that any error, misstatement, or misrepresentation of fact, either with or without intention on his part, such as might if known, cause a refusal of this application or any alteration or change in plans made without shall constitute sufficient grounds for an enforcement action and/or hold on my permit.
