# TYRONE STORMWATER NEWS UPDATE

## FALL 2018

BRAD KONWICK, ENVIRONMENTAL  
DEPARTMENT

There are several sources of stormwater pollution unique to autumn, and we need your help to control them. The leaves are falling, and their improper disposal poses a threat to our water resources. Fall is also the season of fertilizing and controlling winter weeds in your lawn. Do not use fertilizers immediately before a rainstorm, and do not apply them in excess. For more stormwater tips this fall, please see the [attached](#). Remember, clean streets for clean water.
