
TYRONE STORMWATER NEWS UPDATE

WINTER 2019

BRAD KONWICK, ENVIRONMENTAL
DEPARTMENT

With the excessive rainfall this winter our stormwater infrastructure, which is often out of mind because it is out of sight, can often show problems. Stormwater structures and pipes can develop sinkholes near them because they were defective, improperly installed, degraded with age, or ruptured, often times after a heavy rainfall event. This [linked article](#) highlights how sinkholes form along with their safety concerns, before investigating and correcting sinkhole problems.
