
TYRONE STORMWATER NEWS UPDATE

WINTER 2020

BRAD KONWICK, ENVIRONMENTAL
DEPARTMENT

When you think of city streets, you often just consider the mode of transportation, traffic numbers, and the destination in their planning and design. However, another important component to consider is stormwater runoff from streets. The linkage between pavement and stormwater volume is highly correlated. This [linked article](#) highlights how incorporating green infrastructure into street designs can protect water quantity and quality.
